MOON BIKE 2021

University of Pécs is to launch its project promoting a healthy lifestyle on 15 May

The challenge, called "**MOON BIKE**", is to cycle to the moon together: collect a total of **384 400 km** on bikes with participants from all parts of the world.

In 2020, we completed this in 2 months. Over the full 80 days of the challenge, we covered a total of **937,531.72 km** together.

These are the records we want to beat this year.

Join our challenge, which invites both hobby cyclists and professional riders to clock up the kilometres.

We'll draw valuable prizes each week during the challenge.
